AudIT – for the lecturer

Web-based ARS

For a lecturer:

Setting things up:

- anonymous usage to get it up and running fast
- registered usage to be able to re-access (optional!)
- upload a list of users (*ID;username* pairs) (optional!)

Question types:

- Multiple choice questions
- Open-ended response questions

AudIT – questions (1/2)

Question parameters:

- Display textual answers
 - anonymous, registered, or all answers
 - with or without user names
 - word cloud
- Display MCQ answers
 - number of answers
 - first, last, or all answers to a question
 - anonymous, registered, or all answers
 - bar graph or pie chart

AudIT – questions (2/2)

Questions are posed elsewhere! No upload.

Question options:

- delete votes
- start/stop accepting votes
- next question
- hide/display results
- answer counter (unique, registered, anonymous, total)
- mark correct answers

Download complete results

AudIT – additional features

- Assessment of answer uniqueness
 - similarity of textual messages using adaptation of Jaro-Winkler algorithm
- Redirection of answers to standard input
 - in order to redirect them to another application like <https://tobloef.com/text2mindmap/>
- Making textual answers available at a secret URL so they can be read and processed with custom developed applications

AudIT - audience

For the audience:

- access using alphanumerical ID or QR code
- register using their school ID
- send answers anonymously or with their ID
- see answer history

THANKS!
